

Dispense-a-Pill

Safe, simple pill organizing and dispensing ensures the right medications are taken at the right time.

It's designed with your health in mind.

- Forgetting to take your medication?
- Taking them at the wrong time?
- Frustrated with hard-to-read labels and hard-to-open bottles?
- Concerned that your loved ones are not taking medication as prescribed?
- Need a solution to simplify medication dispensing?

Remembering exactly which medications to take – and when – can be a challenge, even for the most organized person. Now **Dispense-a-Pill** (DAP) lets you manage your medication routine at home and improve your quality of life. This smart, automated medication manager makes plastic pill organizers obsolete. With DAP, you or your caregiver can schedule the proper dose and time for up to 16 medications, just as your doctor intended. It even alerts you when one of your medications is running low, so you'll have plenty of time to get a prescription refilled.

DAP helps you adhere to your medication routine with personalized reminders and built-in flashing lights and sounds, so you can better manage your health.

It's simple, reliable and effective.

Sorting and organizing pills by hand can lead to dosage mistakes with serious consequences. DAP's patented breakthrough automated pill-dispensing technology ensures the correct number of pills are dispensed from each chamber. DAP stores and manages a 90-day supply of pill medications within the unit.

DAP also offers you the flexibility to set reminders and manage alerts for your non-pill medications, such as topical creams, liquids, eye drops, inhalers or insulin injections.

DAP is the one system for ALL your medication needs.

About 50% of the **2 billion prescriptions**

filled each year are not taken correctly.

It's your personal medication manager.

Gain peace of mind and independence with DAP managing your medication routine:

- **Personalized reminders** ("Don't forget to take your medication, Grandpa.") to encourage you to stick to your medications as prescribed
- **On-demand dispensing** for as needed medication
- Medication dispensing **information recorded, reviewable and adjustable** at any time
- **Up to 5 trusted caregiver contacts** alerted by phone if a dosage is missed
- **FunMinders™** - personalized reminders about life's other important activities, errands or appointments
- **Secure controlled access** and childproof settings
- **Coordination** with your existing health monitoring service

how DAP works...

1 PROGRAM

Medication names, dispensing dosage and schedule, reminders, and caregiver contact information are entered into your DAP by you or a caregiver.

2 LOAD

Pour each pill prescription into its assigned DAP chamber.

3 DISPENSE

Pills are dispensed automatically at the designated time. The cup containing medications is accessed at the touch of a button.

4 REPORT & ALERTS

DAP records the date and time each medication is taken. Caregivers are alerted if a dosage is missed.

Frequently asked questions

Who can DAP help?

DAP can help any individual who needs to manage multiple medications (e.g. treating a chronic illness) or has had challenges (confusion, forgetting) taking medications as prescribed.

How many people can use a DAP?

DAP is a personal device that manages a medication routine for one person.

What is the size of a DAP unit?

The DAP is 9.5" x 8" x 8.5" and weighs 10 lbs – it can fit easily on your kitchen counter.

Can I use my existing phone line to use the phone alerts?

Yes! You can plug DAP in to your home's existing phone line.

Dispense a Pill

DAP was invented by HealthOneMed, a company created to maximize the effective delivery of home-based health care to improve people's lives.
